Dods Bangladesh

Skills Development Partnership with LCBS Dhaka

Core Training Programmes in Public Administration for civil servants, local government officials and public sector employees.

Following the announcement of our new partnership with LCBS Dhaka, and a request for a schedule of training programmes, Dods Training would like to offer its services to the Government of Bangladesh.

Dods Training designs and delivers bespoke training programmes which are tailored to an organisation's precise, individual needs and hence this offering is designed to provide the Government of Bangladesh with some suggested topic areas by which training needs might be identified. We would be very happy to discuss any further topic areas beyond those programmes suggested.

These training programmes can take place in London, Dhaka, or any other desired international city location depending on your preferences. We can design courses lasting from one day to several weeks for staff at every level of an organisation on a broad range of subjects.
